```
1. Write the link from the contact page to the links page

2. Write the path to link your instructor's bio image to his about page
`<img src="                              " />`

3. What is the path to link the background.png as the background for the body in the style.css?
`body{ background-image:url(                    ); }`

4. Write the path to the home page from winter01.html
`<a href="                    ">Home</a>`

5. Finish the img tag for the logo on fall01.html
`<img src="                    " alt="logo" />`

6. `<a href="../links.html">Links</a>` is a(n):
`Relative link | Absolute link | Internal link`

7. `<a href="http://www.sheridancollege.ca>Sheridan college</a>` is a(n):
`Relative link | Absolute link | Internal link`

8. `<a href="#top>Back to top</a>` is an example of a(n):
`Relative link | Absolute link | Internal link`

9. Write an email link that would email you. Use your name as the link text.

10. `<a href="http://www.dsgn18081.info" target="_blank">DSGN 18081</a>` will open the class site in a new browser tab/window
`True | False`
