WEB PAGE EVALUATION

NAME:

NOTES:

Design
- The page presents a unified visual style (colour scheme, font choice and imagery complement each other and are they appropriate for the content and context)
- Images support the design intent described in the rationale – including appropriate use of texture, iconography and imagery
- Text size and weight is appropriate and legible–the page easy to scan/read
- There is an effective hierarchy present (whitespace, contrast, size, etc.)

/20

HTML
- Content is semantically and hierarchically structured by applying the appropriate HTML elements.
- <div> elements have been used where appropriate to group or separate web page components
- The original source is properly cited and linked with a valid anchor tag
- HTML validates against W3C validation service (-0.5 for each error)

/20

CSS
- All styles are placed in a linked stylesheet
- There are no extraneous selectors or deprecated properties
- Source formatting been applied with appropriate indentation & spacing
- A Webfont has been included in the design and functions as intended
- CSS validates against W3C validation service (-0.5 for each error)

/20

Images
- There is a minimum of 2 images (one content, one background)
- Images have been properly sized and saved for Web
- Images have alt text applied where appropriate

/10

Files & Formatting
- <meta> elements are used and appropriately reflect the content
- Title of the Web page is defined and descriptive?
- The custom meta elements (recipe category,
- ingredients and preparation time)defined by the instructor been included in the web page.
- CSS style sheets and images located in separate and appropriately named folders

/10

Rationale

/10   **TOTAL**
